DOT1X SIG

Group:

The 802.1X Special Internet Group comprises members of the community and selected industry experts and has been formed to research and maintain a watching brief of developments of the technology and to inform practical application of 802.1X for the Janet community. This includes, but is not limited to, input into steering of the eduroam(UK) service, .1X supplicants and deployment/configuration tools. What is the DOT1XSIG? - scope of group [1]
