

Joining the Managed Router Service

If you require the Managed Router Service as part of your new connection or as part of a connection upgrade the service requirement will be included in the contractual documentation provided at the start of this process. This is counted as your written confirmation for joining or opting out of the Janet Managed Router Service.

Existing connections wanting to join the Managed Router Service should contact the Janet Service Desk ^[1] by email. Please note verbal requests will not be accepted. The provision of your MRS will begin from the date agreed by both parties. Once the request has been received the managing agent will be in contact with the site to discuss router access details.
